

Designing the Right Muzzle

Please size your dog to make sure that you receive a good fit muzzle. You need measurement tape or some sort of string which you can place next to a ruler for sizing. Record these measurements with the Labels listed below (so they get relayed to the muzzle-fitter properly by Dr. Feltes).

How to measure your dog for good fit muzzle:

1. **Length** - Distance from the tip of the nose to eye line in inches
2. **Circumference** - Circumference around snout one inch below eye line in inches
3. **Eye Line** - Distance from eye line to right behind the ears in inches
4. **Neck Circumference**- Circumference around neck behind ears in inches

5. **Width**- Snout width in the widest part

6. **Height** - Snout height , should be measured with mouth a little open
